Report Explan.

E.canis Ab

A positive result indicates the canine Ehrlichia canis antibodies are present in the sample. Even if the result is negative, the possibility of E.canis-infection cannot be ruled out.

* As with all other diagnostic tests, a single test result should not be used as the sole basis for clinical diagnosis but rather should be comprehensively evaluated by a veterinarian in combination with clinical symptoms and other laboratory test results.

Note: Due to the complexity and individuality of disease diagnosis, the report interpretation is only for your reference. Please consult your doctors for clinical diagnosis results.
The results only applies to this test sample.
