**Immunoassay Test Report**

Pet Name: Onchogi

Owner Name: Russel Delos Santos

Species: Canine

Gender: Female

Age: 2Year

Patient or Visit No.:

Sample ID: 202606160001

Time Tested: 16/06/2026 02:22:19

**Test Result**

| Test | Result      | Unit  | Reference Range                                                 |
|------|-------------|-------|-----------------------------------------------------------------|
| SDMA | 8.85 Normal | µg/dL | ≤14 µg/dL Normal<br>14-19 µg/dL Suspected<br>>19 µg/dL Abnormal |

**Clinical Significance**

SDMA

Symmetric dimethylarginine (SDMA) is a methylated arginine amino acid. Most of SDMA is excreted by the kidneys. SDMA is an early biomarker of kidney function. It correlates well with glomerular filtration rate(GFR). SDMA tests diagnose chronic kidney disease (CKD) and acute kidney injury (AKI) much earlier than creatinine tests.

Veterinary Technician: not specified

Attending Veterinarian: Dr. John Paul Landingin

Date Reported: 17/06/2026
